

Package Contents

The e3 / e3w package includes:

- Power adapter and cable
- 2x WiFi antenna (e3w model)
- e3 / e3w appliance

Installation

1. If you have the wireless edition (e3w), fasten the included WiFi antennae to the SMA connectors on the rear of the device.
2. Connect an ethernet cable from your Internet modem or router to WAN 0.
3. If you have a secondary Internet connection, connect the cable from your Internet modem or router to WAN 1.
4. Plug in the power adapter to a power source and connect it to the power input on the rear panel.
5. Confirm that the LED on the top of the unit is green and wait approximately one minute for the firmware to load.

Getting Started

You can manage your Untangle SD-WAN Router via Command Center or from the local network.

From Command Center

1. Navigate your web browser to <https://untangle.com/cmd>.
2. Log in with your Untangle Command Center account, or click **Create Account** to set up an account.
3. Navigate to the Appliances screen and click **Add**.
4. Enter the Untangle serial number located on the bottom of your appliance.

5. Click **Add** to confirm the new appliance.
6. After the appliance successfully adds to your account, you can select it from the list of appliances.
7. Click **Remote Access** to connect to the administration of your new appliance.
8. Continue to the setup wizard.

From the local network

1. Connect an ethernet cable from your management computer or LAN switch to the LAN port.
2. Alternatively, for e3w installations you can connect to the WiFi network named **Untangle** using the default password **12345678**.
3. From your management computer, check the network status of your system and confirm that you receive an IPv4 address in the subnet of 192.168.1.0/24 (e.g. 192.168.1.100).
4. In a browser, navigate to <http://192.168.1.1> and continue to the setup wizard.
